WATER ANALYSIS

We offer a free 22 parameter water analysis to prospective customers. Our on-site field analysis tests the following parameters using titration and testing strips methods:

pH	Total Dissolved Solids
Total Alkalinity	Total Hardness
Calcium Hardness	Magnesium Hardness
Total Chlorine	Combine Chlorine-Chloramine
Free Chlorine	Cyanuric Acid
Copper	Hydrogen Sulfide
Lead	Manganese
Mercury	Nitrate
Nitrite	Sulfate
Zinc	Fluoride
Sodium Chloride	Iron

Based on the results of the analysis, your desired water quality, space constraints, water supply, and project budget we can recommend a custom treatment option and provide you with an estimate onsite.

SERVICES WE OFFER

Whole House Custom Solutions

Example System

To achieve the water quality you want and deserve we install a combination of point of entry treatment components that can include:

- Prefilters
- Sediment Filters
- Gran. Activated Carbon
- Activated Carbon Block
- KDF Media Filters
- Salt-Free Conditioners
- Salt-Based Softeners
- UV Light Disinfection

Specifically For You

With EZFlow Water Solutions you will receive a personalized water treatment solution based on the results of our comprehensive 22 parameter onsite water analysis.

Other Products and Services

Point-of-Use Reverse Osmosis

5 Stage RO

- 50 Gal/Day Capacity
- Removes 99% of Contaminants
- Includes Air Gap Installation and Hole Drilling

As Low as \$500 Installed

6 Stage RO

- 75 Gal/Day Capacity
- Re-mineralizes Water For Natural Refreshing Taste
- Ph Balancing
- Removes 99% Of Contaminants

As Low as \$700 Installed

7 Stage RO with UV

- 75 Gal/Day Capacity
- Re-mineralizes Water For Natural Refreshing Taste
- Ph Balancing
- UV eliminates 99% of microbes
- Bottled Water Quality at Your Fingertips

As Low as \$850 Installed

Backflow Assembly Testing and Repair

EZFlow Water Solutions is licensed and Certified for Backflow Prevention Assembly Testing in the State of Texas. We are licensed to test, repair, and certify all types of backflow preventers. To keep you within code compliance with your water purveyor, we provide and submit written certification (TCEQ-20700) upon the completion of each test and repair to your municipality.

Residential: \$125
per Tested Assembly + Repair cost
Commercial: \$225
per Tested Assembly + Repair cost

WATER TREATMENT SOLUTIONS

If you're worried about the chemicals, chlorine, smell, taste, clarity, sediment, or rust in your water, a carbon filtration system will remedy the issue. If you're worried about scale and hard water, we have multiple solutions depending on the severity. For low levels of hardness, a water conditioner will be a good low-maintenance solution. A traditional ion-exchange salt-based softener will always be the best option for higher levels of water hardness. If you are satisfied with your current water quality, but just want some high-quality H₂O to drink and cook with, a point-of-use RO system would be an excellent option. We offer a 5, 6, and 7 stage (with UV) systems fully installed including hole drilling and airgap installation. Contact us to schedule a water analysis and receive the treatment solution that is right for you and your home.

SYSTEMS DESIGNED FOR EASE OF MAINTENANCE

All of our Point of Entry systems are installed with UPONOR (Pex-A) because it's the most freeze rupture resilient material available. All cutoff valves are bronze quarter turn ball valves for quick and reliable operation year after year. All POE systems have a bypass, inlet, and outlet cutoff valves for easy maintenance while maintaining home water pressure during the process. Inlet and Outlet liquid filled water pressure gauges are installed to monitor system pressure and help in diagnosis if any issues ever arise.

2 YEAR WARRANTY AND 12 MONTHS PREMIUM "NO WORRY" MEMBERSHIP

On top of our 2 Year Warranty that protects you from material defects and poor craftsmanship. We offer 12 months of Premium Membership for FREE. Premium includes the following perks:

- ✓ Free filter changes as needed (Filters included)
- ✓ Annual sterilization (RO)
- ✓ Annual water analysis
- ✓ Expedited Service
- ✓ 20% Discount on parts and labor not covered by warranty (Freeze Rupture)
- ✓ 50% Discounted Emergency service fee
